## **Construction Power Solutions, Inc. specializes exclusively in Heavy Equipment and Commercial Fueling**

Our owner/operator has been in this industry for 22 years and has worked directly with Sunbelt Rentals for 8 years.

Construction Power Solutions, Inc. currently operates three fuel trucks – all late model vehicles and equipment.

Our newest truck has a 2200 gal capacity between (4) Individual Tanks (700 / 700 / 400 / 400).

- (1) 700 & (1) 400 (1100gal) are for Clear Diesel and the same set up for Dyed Diesel.
- (2) This fuel truck has a 120' 1 ¾ Delivery Hose (that is very beneficial for reaching trucks and equipment that are in hard to reach spaces. This distance also allows for, in most cases, being able to stay on the road, while fueling equipment that may be in dirt / mud. Eliminating mud and debris onto roadways.
- (3) In addition to 120' of reach, this truck is equipped with a 100 Gallon per Minute Pump, a Scully Nozzle w/ Auto Shut off. A "Self-Purging" system that allows to switch between different products without any contamination whatsoever. The meter has the ability to set a certain amount, and it will shut off at that amount. It will also print a ticket / receipt for each fueling.

This Fuel Truck is a Job-Site answer to prayers!!

In April 2019, our trucks just had their Certifications Renewed for:

- a. Vapor Recovery
- b. Pressure Test
- c. Weights and Measures (for Metering Calibrations)

All of our employees are OSHA Certified, and will always wear Full PPE while on your sites.

In addition to fueling, if you so desire,

- a. Our guys will check and record all other fluid levels
- b. Do a "Visual Inspection" of the outer perimeter of the equipment (if they notice any problems, they will document it on the receipt. If there appears to be something Critical / Dangerous, we will immediately notify the provided Site Contact, as well as leave a Note in the cab of the vehicle.

We always complete an Itemized Receipt for all fueling. This receipt will line-by-line list:

- The Unit / Vehicle Number (or Lic. Plate)
- The Hours / Mileage (if accessible)
- A description of the equipment
- And will list the Exact Gallons pumped

A copy of that receipt is available upon request, or may be attached to the Billing Invoice.

We would love the opportunity to provide you with a quote, and would appreciate if you would consider what Construction Power Solutions, Inc. has to offer – and how we stand out from the competition!

Due to our consistent high fuel volumes, we receive a substantial discount on fuel pricing thru our distributor. We am confident Construction Power Solutions, Inc. can provide you with a lower cost per gallon, and a far superior service than what you may be getting now!
